Hi Alexis,

I have installed Dropbox on my laptop. Everything worked and I have all of the documents.

Thanks.

Gary

Hi Gary

Per Lek's request, I created a dropbox account for you to access information relating to hydraulic fracturing. You should see a confirmation e-mail shortly.

- You can access the site here: [www.dropbox.com](http://www.dropbox.com)

- Here is your login: (b)(6) privacy

- This is your current password (feel free to change it under settings): (b)(6) privacy

I've uploaded some initial documents for you, including the Phase V Pavillion report, appendices, data tables, and the USGS administrative report. You should also see an invitation to the shared folder for Hydraulic Fracturing. You need to accept this invitation to view this folder, which contains a lot of background and communication materials (congressional letters, responses, etc.) relating to our HF study.

Let me know if you have any questions.
